**Amendments to the Specification:**

Please replace the title with the following amended title:

**"System and Method for Organizing and Presenting Information Relating To The Interpretation of Multiple Information Elements, Such As Patent Claim Elements, In At Least One Reference Source and Graphical User Interface Incorporating The Same"**

Please replace paragraph [0009] with the following amended paragraph:

[0009] The invention also relates to a graphical user interface incorporating one or more of the embodiments described herein~~any of the preceding method claims~~. In another aspect, the invention relates to a graphical user interface for organizing and presenting information relating to the interpretation of multiple information elements from at least one reference source comprising an array having a first predetermined number of rows and a second predetermined number of columns defining matrix elements at the intersections of the rows and columns, wherein each of one of the first predetermined number of rows and the second predetermined number of columns of the matrix correspond to an information element and each of the other of the first predetermined number of rows and the second predetermined number of columns correspond to the at least one reference source. The matrix elements thereby contain a link to a reference location within the at least one reference source relating to the interpretation of an information element and setting the link to null if no information relating to the interpretation of the information element exists in the at least one reference source. A customizable workspace is provided that is viewable by a user wherein the links within the array can be selectively activated and viewed by the user.
